

Power and lighting required? We can help

First Choice Services (UK) Ltd is a Kent-based firm that has been trading for 25 + years offering an experienced, professional and reliable service to a variety of clients that require re-fit electrical installations in shops, offices, cafes, restaurants, gyms, car showrooms to name a few.

In February 2020 we completed our 80th Costa Coffee store for one of our long-standing clients who has a large franchise that covers Kent, Surrey, Sussex and Essex. The latest store is in Rochester Riverside, Kent, a new developmental area near Rochester train station and took just under a month to complete. Our team are proficient at the installation and know our client's requirements well. We used our local wholesaler for accessories and Led lighting and our preferred fire alarm supplier on all the stores in the last four years. The store opened on time and on budget.
